**Subject:** Supporting Information from Appendix H

Bob:

I hope you are well. An outside group led by Ann Maest has been working on a hydrology model to evaluate water quantity and quality related issues associated with our mine scenario. Ann indicated that it would be helpful for her model efforts if she had access to some of the information that you relied on in Appendix H.

I've cc'ed Ann on this message so that she can reach out to you directly with her request.

Thanks in advance for assisting her.

-Palmer
